

Social art, a tool for educational mediation and inclusion

Social art is a **holistic approach** that integrates the development of mental, emotional and physical abilities.

It is an educational principle that **strengthens inclusion and social cohesion**.

I will coordinate in May 2022, with **the IRTS Ile de France**, a one-week **workshop**, with social work students.

It is a **focus on this pedagogical experimentation** that I wish to share with you during the 9th INTERNATIONAL CONGRESS AIFRIS.

Samuel MALLANGEAU, trainer at **the IRTS of Montrouge-Neuilly sur Marne**.
